Xth Standard	Rotary High School	STATE	2010	69%

Skill sets:

Languages: C, C++, Python.

Operating System: Linux, Window

Web: HTML,CSS ,Javascript.

University Projects:

Project 1: Title: Dispersion Of Light

Team Size: 2

Description: This project is based on Computer Graphics and Visualization. This a simple project developed in graphics using OPENGGL. GL libraries are used to make the project. This mini project is based on **Dispersion Of Light**. Where we show the behavior of light in Medium like **Prism & Raindrop** and dispersed into seven colors, it also explains the origin of colors .

Project 2 : Title: Virtual Network Computing

Team Size: 4

Description: This project is based on Android arm-based architecture. In this project we describe the system to access the remote desktop within the Wi-Fi range but we can do this with cloud computing also rather than with Wi-Fi this can be done with the help of virtual network computing(VNC) architecture for that VNC server must be installed on Remote Desktop and VNC viewer will be provided on Android mobile for secure communication it first required IP address of Server (Remote Desktop) then password(given by server to client) then only after authentication we got access of remote Desktop. VNC can be used on irrespective of various platforms like Ubuntu ,Mac or windows. The image of the desktop is compressed before it is transmitted to the Android Mobiles.
